Notes and Details

1 Million Boxes Per Week, 52 Weeks \$24, No Deposit or Escrow

I wanted to bring this program your attention, because of the limited time that this will be available and the various features that might make this a good fit for a buyer or exit you might be working with.

Hybrid Program: Functions like OTG with Production Prices

This is an ongoing program to secure 1 Million Boxes of Cranberry Evolve per week for 52 Weeks. The MOQ is only 1 Million, so a full-contract is not necessarily required. Read carefully so that I can explain the competitive benefits of this.

Funds Stay In the Buyer's Account or Escrow

The seller needs to make sure that the buyer *has* the funds to purchase the goods, but there is no requirement to move those funds to the seller's account or the seller's escrow until the full proof of product has been provided, which would include SGS, Lot and Batch Numbers, and Airway Bill or Bill of Lading. The seller can also provide a video, if helpful.

Good Prices, Consistent Access to Reliable Product: \$25 Air, \$24 Sea

There are "gray market" goods in the U.S. Market, which are of non-Malaysian origin. The product from *this* program comes directly from Malaysia, with all the manufacturing confirmation from the Manufacturer. You have the documentation to confirm that the product was manufactured by the manufacturer, has been inspected and loaded on a cargo ship or plane, and those are the goods that you will be taking possession of. Yes, you might talk to someone who claims to be able to get a lower production price, but in order to do so, they would need to put up the financial instruments or deposits with the manufacturer.

No Deposits or Financial Instruments Required

Normally, a buyer would have to put up a financial instrument, or deposits with the manufacturer OR a financier to secure product, directly from the factory. Someone else has done this, in this instance. And further, the seller does not require that the buyer put up an advance deposit. Since someone else has put up the deposits, this opens up more flexibility to additional buyers.

Help with Logistics or Exit Sales

The seller has additional warehouse capacity in Florida and can help store and transport the product, and even help the buyer sell the goods, if needed. The low price provides more opportunities for better margins and the ability to sell to end users.

Product Received in 2 Days, Then Weekly, Titled in Name of Buyer

The Buyer will receive product in 2 Days Via Air Cargo. To provide for a consistent flow of product and to optimize costs, the first 5 weeks are delivered via air-cargo, and weeks 6+ are delivered by sea. The buyer only needs to deploy funds for the current week's shipment.

Scarcity and Time Sensitive Notification

There are multiple lines, but they may go quickly, therefore it's important to discuss as quickly as possible. Feel free to schedule a call on my calendar using the link in my email signature.
